Do I need Income Protection and Trauma cover?

Most people don't think twice about insuring their car or home – but when it comes to income protection and trauma insurance, they can't justify it.

While the chance of your car being stolen and not recovered is 1 in 800 or claiming on your Home & Contents policy is 1 in 13, the chance of being disabled for over 3 months before age 65 is 1 in 3 and the chances of being diagnosed with cancer before age 75 are 1 in 3 men and 1 in 4 women*.

Ask yourself these quick questions –

- Could you meet your mortgage repayments without your income?

- Do you have sufficient savings to meet required living expenses over an extended period?
- Are you able to afford large medical bills from a major illness or accident?

While no one likes to dwell on the 'what if's', having a plan to protect yourself and your family will give you peace of mind.

As an experienced Financial Adviser, John knows that it is important to have the right cover, which is fully underwritten so if a 'what if' happens to you, there are no unknowns at the time of claim.

Contact John Nash on 02 6772 8008 for a full review of your current insurance.
